## Plan Summary Submission

### Electronic Submission

Company Name

Eacom Timber Corporation

Facility Name

Nairn Centre Sawmill

Report Submitted By (authorized delegate)

Angela Rainville

I, the authorized delegate, acknowledge that by pressing the "Continue" button, I am electronically submitting the facility TRA Plan Summary for the identified facility.

### Substances

11104-93-1, Nitrogen oxides (expressed as NO2)

11104-93-1, Nitrogen oxides (expressed as NO2)

### Substances Section Data

### Statement of Intent

Are the following included in the Facility's TRA Plan?

### Use

Is there a statement that the owner or operator of the facility intends to reduce the use of the toxic substance at the facility?: \*

No

If 'yes', exact statement of the intent that is included in the facility's TRA Plan to reduce the use of the toxic substance at the facility: \*\*

If 'no', reason in the facility's TRA Plan for no intent to reduce the use of the toxic substance at the facility: \*\*

EACOM Timber Corporation does not use nitrogen oxides during any of the site processes. It is created during the site processes as a by-product of the burning of biomass and natural gas used to heat the lumber drying kilns. The company will continue to investigate opportunities to minimize its nitrogen oxide emissions.

## Creation

Is there a statement that the owner or operator of the facility intends to reduce the creation of the toxic substance at the facility?: \*

No

If 'yes', exact statement of the intent that is included in the facility's TRA Plan to reduce the creation of the toxic substance at the facility: \*\*

If 'no', reason in the facility's TRA Plan for no intent to reduce the creation of the toxic substance at the facility: \*\*

EACOM Timber Corporation does not intend to reduce its creation of nitrogen oxide as it is a by-product of essential site processes. nitrogen oxides are created from the burning of biomass and natural gas which provide energy for the site processes. The company will continue to investigate opportunities to minimize its nitrogen oxide emissions.

## Objectives, Targets and Description

### Objectives

Objectives in plan: \*

none

### Use Targets

What is the targeted reduction in use of the toxic substance at the facility? \*

**No quantity target**

**Quantity**

Summarize why the toxic substance is used at the facility: \*\*

## Reasons for Creation

Why is the toxic substance created at the facility?: \*

Summarize why the toxic substance is created at the facility: \*\*

## Toxic Reduction Options for Implementation

Description of the toxic reduction option(s) to be implemented

Is there a statement that no option will be implemented?: \*

If you answered "No" to this question, please add the option(s) under the appropriate Toxic Substance Reduction Categories (e.g. Materials or feedstock substitution, Product design or reformulation, etc.). If you answered "Yes" please provide an explanation below why your facility is not implementing an option.

Explanation of the reasons why no option will be implemented: \*\*

EACOM TIMBER CORPORATION has confirmed that, as a result of its technical and economic investigations, it will not be implementing any of the 7 options that might specifically and measurably reduce nitrogen oxide identified in the plan. However, the Company will continue its preventative maintenance and training to maximize the efficiency and keep the emissions from our Konus biomass fuel burning at to a minimum by maintaining an efficient operation and to manufacture according to C of A mandates. Although a focus in training or improved operating practices will not provide a measurable reduction in emissions, the company is dedicated to ensuring the Konus operates at maximum efficiency. It is our goal to keep operational times to a minimum and doing so will ensure that less biomass will be used and therefore creating fewer emissions. We are committed to managing our process in a manner which controls emissions to the greatest extent possible within the technical and economic constraints of our industry. Furthermore, the company will always keep an open mind of the option of burning a cleaner fuel such as natural gas, when it is practicable to do so and available at the location.

License Number of the toxic substance reduction planner who has certified the toxic substance reduction plan for this substance (format TSRPXXXX): \*

What version of the plan is this summary based on?: \*

New Plan

## NA - M08, Total Particulate Matter

NA - M08, Total Particulate Matter

### Substances Section Data

#### Statement of Intent

Are the following included in the Facility's TRA Plan?

#### Use

Is there a statement that the owner or operator of the facility intends to reduce the use of the toxic substance at the facility?: \*

No

If 'yes', exact statement of the intent that is included in the facility's TRA Plan to reduce the use of the toxic substance at the facility: \*\*

If 'no', reason in the facility's TRA Plan for no intent to reduce the use of the toxic substance at the facility: \*\*

The toxic substance is not "used" at the facility. it is a natural component of the feedstock (wood). As logs are sawed into dimensional lumber, fine particulate matter is released and becomes airborne. Biomass derived from the by-products of site process (bark, sawdust, and wood chips) is burned onsite to heat the kilns, which also contributes to the creation of the majority particulate matter emissions.

#### Creation

Is there a statement that the owner or operator of the facility intends to reduce the creation of the toxic substance at the facility?: \*

No

If 'yes', exact statement of the intent that is included in the facility's TRA Plan to reduce the creation of the toxic substance at the facility: \*\*

If 'no', reason in the facility's TRA Plan for no intent to reduce the creation of the toxic substance at the facility: \*\*

EACOM Timber Corporation does not intend to reduce its creation of total particulate matter as it is a by-product of essential site processes. the majority of total particulate matter is created from the burning of biomass which is used to heat the lumber drying kilns- an essential process. Another portion of the total particulate matter emissions are created when the raw feedstock (logs) are sawn into dimensional lumber so it may be sold as a product. The company will continue to investigate opportunities to minimize its total particulate matter emissions.

#### Objectives, Targets and Description

## Objectives

Objectives in plan: \*

none

## Use Targets

What is the targeted reduction in use of the toxic substance at the facility? \*

No quantity target	Quantity	Unit
<input checked="" type="checkbox"/>	or	<input type="text"/>

What is the targeted timeframe for this reduction? \*

No timeline target	years
<input checked="" type="checkbox"/>	or <input type="text"/>

Description of targets

## Creation Targets

What is the targeted reduction in creation of the toxic substance at the facility? \*

No quantity target	Quantity	Unit
<input checked="" type="checkbox"/>	or	<input type="text"/>

What is the targeted timeframe for this reduction? \*

No timeline target	years
<input checked="" type="checkbox"/>	or <input type="text"/>

Description of Target

## Reasons for Use

Why is the toxic substance used at the facility?: \*

This substance is not used at the facility

Summarize why the toxic substance is used at the facility: \*\*

## Reasons for Creation

Why is the toxic substance created at the facility?: \*

As a by-product

Summarize why the toxic substance is created at the facility: \*\*

EACOM Timber Corporation does not use total particulate matter during any of the site processes. It is created during the site processes as a by-product of the burning of biomass used to provide energy for the site, and a by-product of sawing the wood into dimensional lumber. The company will continue to investigate opportunities to minimize its particulate matter size total particulate matter emissions.

## Toxic Reduction Options for Implementation

### Description of the toxic reduction option(s) to be implemented

Is there a statement that no option will be implemented?: \*

Yes, we are not implementing

If you answered "No" to this question, please add the option(s) under the appropriate Toxic Substance Reduction Categories (e.g. Materials or feedstock substitution, Product design or reformulation, etc.). If you answered "Yes" please provide an explanation below why your facility is not implementing an option. Explanation of the reasons why no option will be implemented: \*\*

EACOM TIMBER CORPORATION has confirmed that, as a result of its technical and economic investigations, it will not be implementing any of the 7 options that might specifically and measurably reduce total particulate matter emissions identified in the plan. However, the Company will continue its preventative maintenance and training to maximize the efficiency and keep the emissions from our Konus biomass fuel burning at to a minimum by maintaining an efficient operation and to manufacture according to C of A mandates. Although a focus in training or improved operating practices will not provide a measurable reduction in emissions, the company is dedicated to ensuring the Konus operates at maximum efficiency. It is our goal to keep operational times to a minimum and doing so will ensure that less biomass will be used and therefore creating fewer emissions. We are committed to managing our process in a manner which controls emissions to the greatest extent possible within the technical and economic constraints of our industry. Furthermore, the company will always keep an open mind of the option of burning a cleaner fuel such as natural gas, when it is practicable to do so and available at the location.
