Upload Document

A copy of the certification statement(s) from the Highest Ranking Employee and the Licensed Planner(s), for the Toxic Substance Reduction Plan for which the Plan Summary is being submitted are required. Please upload a single document containing all certifications.

Do not upload any certification statements that are dated after December 31. If this applies, click "?" (Help)

for more information.

Comments

The 2014 toxic reduction plan had to be revised this year, well after the December 31 deadline. With the guidance of the toxic reporting helpdesk, it was determined that a CONFIRMATION statement would be appropriate in this case.

Plan Summary Submission

Electronic Submission

Company Name

Eacom Timber Corporation

Facility Name

TIMMINS Sawmill

Report Submitted By (authorized delegate)

Angela Rainville

I, the authorized delegate, acknowledge that by pressing the "Continue" button, I am electronically submitting the facility TRA Plan Summary for the identified facility.

Substances

127-91-3, Beta-Pinene

127-91-3, Beta-Pinene

Substances Section Data

Statement of Intent

Are the following included in the Facility's TRA Plan?

Use

Is there a statement that the owner or operator of the facility intends to reduce the use of the toxic substance at the facility?: *

No

If 'yes', exact statement of the intent that is included in the facility's TRA Plan to reduce the use of the toxic substance at the facility: **

If 'no', reason in the facility's TRA Plan for no intent to reduce the use of the toxic substance at the facility: **

The company does not use beta-pinene in any of it's processes. Beta-pinene is naturally contained within the raw logs which are processed through the facility.

Creation

Is there a statement that the owner or operator of the facility intends to reduce the creation of the toxic substance at the facility?: *

No

If 'yes', exact statement of the intent that is included in the facility's TRA Plan to reduce the creation of the toxic substance at the facility: **

If 'no', reason in the facility's TRA Plan for no intent to reduce the creation of the toxic substance at the facility: **

EACOM TIMBER CORPORATION does not intend to reduce its creation of beta-pinene because the feed stock (natural round wood/logs) naturally contains beta-pinene, which is released during the drying process. Our product must be heat treated as required by law. Unfortunately technology does not appear to exist for usefulness of collecting the steam or eliminating it. The company is committed to running its heat treat process at maximum efficiency to prevent excess emissions and minimize unwanted delays in heat treatment process times. The company will continue search opportunities for toxic reductions

Objectives, Targets and Description

Objectives

Objectives in plan: *

to continue to explore other opportunities to reduce toxic substances

Use Targets

What is the targeted reduction in use of the toxic substance at the facility? *

No quantity target

Description of Target

Reasons for Use

Why is the toxic substance used at the facility?: *

This substance is not used at the facility

Summarize why the toxic substance is used at the facility: **

this substance is not used at the facility, but is naturally contained within the raw logs which are processed through the facility.

Reasons for Creation

Why is the toxic substance created at the facility?: *

As a by-product

Summarize why the toxic substance is created at the facility: **

Beta-pinene is naturally contained in the raw logs which are processed through the facility. During the law-mandated heat drying process, beta-pinene is released to the atmosphere. there is no technology to date to capture the steam emitted from the required kiln drying process.

Toxic Reduction Options for Implementation

Description of the toxic reduction option(s) to be implemented

Is there a statement that no option will be implemented?: *

Yes, we are not implementing

If you answered "No" to this question, please add the option(s) under the appropriate Toxic Substance Reduction Categories (e.g. Materials or feedstock substitution, Product design or reformulation, etc.). If you answered "Yes" please provide an explanation below why your facility is not implementing an option. Explanation of the reasons why no option will be implemented: **

EACOM TIMBER CORPORATION does not intend to reduce its creation of beta-pinene because the feed stock (natural round wood/logs) naturally contains beta-pinene and it is released to the atmosphere during the drying process. Our product must be heat treated as required by law. Unfortunately technology does not appear to exist for usefulness of collecting the steam or eliminating it. The company is committed to running its heat treat process at maximum efficiency to prevent excess emissions and minimize unwanted delays in heat treatment process times. The company will continue search opportunities for toxic reductions

Statement of Intent

Are the following included in the Facility's TRA Plan?

Use

Is there a statement that the owner or operator of the facility intends to reduce the use of the toxic substance at the facility?: *

No

If 'yes', exact statement of the intent that is included in the facility's TRA Plan to reduce the use of the toxic substance at the facility: **

If 'no', reason in the facility's TRA Plan for no intent to reduce the use of the toxic substance at the facility: **

Alpha-pinene is not used during site processes. It is naturally contained within the raw logs which are processed through the site.

Creation

Is there a statement that the owner or operator of the facility intends to reduce the creation of the toxic substance at the facility?: *

No

If 'yes', exact statement of the intent that is included in the facility's TRA Plan to reduce the creation of the toxic substance at the facility: **

If 'no', reason in the facility's TRA Plan for no intent to reduce the creation of the toxic substance at the facility: **

EACOM TIMBER CORPORATION does not intend to reduce its creation of alpha-pinene because the feed stock (natural round wood/logs) naturally contains alpha-pinene and it is released to the atmosphere during the heat drying process.
